

**POLAND**

**PRM national training representative responsible:** *Prof. J. HALUSZKA*

**Status of national recognition:** The situation in Poland presently appears as somewhat incoherent. On one side, the centre for postgraduate medical education traditionally organises a training programme and examinations in Paediatric Respiratory Medicine (following training in general paediatrics), while, on the other side, the Ministry of Health does not list any officially recognised paediatric specialities.

***Scroll down for the full contact details of these training centres.***
